

<p>Project: REViSITE Roadmap Enabling Vision and Strategy for ICT-enabled Energy Efficiency www.revisite.eu</p>	
<p>Title: Roadmap Validation Workshop Report</p>	<p>Deliverable 4.3-1c</p>
<p>Work Plan: The Roadmap Validation Workshop focused on the ongoing development of the REViSITE roadmap. The Roadmap consists of the REViSITE vision, the Strategic Research Agenda (SRA), the Implementation Action Plan and the Recommendation for standardisation proposals in the field of ICT for Energy Efficiency. The main focus of this workshop was the SRA.</p> <p>The main objectives of the Workshop, in compliance with the DoW, were:</p> <ul style="list-style-type: none"> • Sanity check and define the timelines for the research priorities identified so far by REViSITE project • Defining the barriers, drivers and impacts of the research priorities classified under the macro categories of the REViSITE SMARTT taxonomy 	<p>Authors:</p>  <p>Antonio Feraco a.feraco@innova-eu.net [INNOVA SpA]</p> 
<p>Executive summary: The second REViSITE validation workshop (VW2) was held on the 16th of June 2011 in Arnhem, the Netherlands and hosted by Kema Consulting in the World Trade Centre. The workshop saw the participation of eight REViSITE Expert Group (REG) members, an expert panel comprising a wide range of academic institutions, research centres and companies from across Europe, and all REViSITE consortium members.</p> <p>This event represents the third of five workshops organized by REViSITE to interact with experts, aligned to ICT4EE (ICT for Energy Efficiency), in order to validate future research priorities and cross-sectoral opportunities identified by the project where ICT can positively impact energy efficiency. This workshop has mainly focused on the definition of the basis for the imminent development of the strategic research agenda.</p> <p>The opportunity to interact with such experts was invaluable in both assessing positively the developed SMARTT taxonomy and the strategy undertaken for the imminent Roadmap development.</p> <p>REG participation was very active and offered the consortium very high qualitative inputs for the future work of the WP3 of the</p>	<p>Nico Vlug Nico.Vlug@dnvkema.com [DNV Kema]</p>

<p>project.</p> <p>Key issues discussed during the workshop are briefly listed here and analysed in depth later in the document:</p> <ul style="list-style-type: none"> • Assessment of the already developed work about the Impact Assessment Model (IAM) and the SMARTT taxonomy, and sanity checking the identified research priorities identified so far by REViSITE for ICT for Energy Efficiency. • Assessment of the strategy identified for the development of the REViSITE Roadmap, hence its SRA and the recommendation for standardisation proposals. • Sanity check of tables containing the ICT research priorities representing the basis for the imminent development of the Strategic Research Agenda, definition of respective timeline for each of the research priorities identified and definition of drivers, barriers and impacts for the macro categories under which the research priorities are classified. <p>In conclusion the event provided a variety of important inputs for the REViSITE programme of work, in particular for the REViSITE roadmap development, and also it represented an initial investigation related to the recommendation for standards.</p>
